

Product information

Pro-Line Diesel-Stabilizer

PI 17/20/05/2019

Description

Preserves and protects the fuel against aging and oxidation while at the same time cleaning the entire fuel system. Prevents corrosion throughout the entire fuel system. Boosts the cetane number. Ensures that diesel operated vehicles and assemblies can be shut down and restarted without any problem. Increases operational reliability. The product has a lasting effect.

Properties

- protects fuel against oxidation and aging
- excellent corrosion protection
- strong antioxidant effect
- traces of copper are neutralized
- prevents seizing and the injector needles from gumming up
- keeps the fuel system clean
- optimizes engine performance
- boosts the cetane number
- tested for turbochargers and catalytic converters
- suitable for diesel particulate filters

Available pack sizes

1 l Can sheet metal 5035
D-GB-I-E-P

Our information is based on thorough research and may be considered reliable, although not legally binding.

Technical data

Base	Additiv-Kombination in Trägerflüssigkeit / additive mixture in carrier liquid
Color / appearance	bräunlich-orange / brownish - orange
Form	flüssig / liquid
Density at 15 °C	0,874 g/cm ³
Odor	charakteristisch / characteristic
Flash point	> 63 °C

Areas of application

Suitable for all diesel engines – particularly for preventive use. Tested for use with turbochargers, catalytic converters and DPF.

Application

Add to the fuel and repeat dosage after refueling. Filling the dosage chamber (25 ml) is sufficient for 12.5 l of fuel (dosage 1:500). Also suitable for long-term use in seldom used engines. Before decommissioning, add the appropriate amount to the tank and run the engine for approx. 10 minutes.
